QUALITY

CERTIFIED WIRQUIN QUALITY

Some of our products comply with all the requirements of the following standards (technical tests and ongoing audits):

* certified products indicated in the catalogue

THE ECOLABELS

Wirquin is committed to promoting products from sustainably managed supply chains. Our FSC and PEFC certifications guarantee that some of our wood-CLOSE-COUPLED products come from a supply chain controlled end-to-end, from the raw material to the finished product.

CERTIFIED INDUSTRIAL PLANTS

We are ISO 9001 certified (quality management), ISO 14001 (environmental management) and OSHAS 18001 (occupational health and safety management).

ECO-FRIENDLY PACKAGING

As manufacturer, it is our responsibility to manage our waste and take action to reduce it. That's why, since 2020, Wirquin has begun replacing plastic packaging with cardboard packaging. The use of recyclable packaging allows us to save 5.8 tons of CO².

THE PROMISE OF AN INGENIOUS AND SUSTAINABLE PRODUCT

For over 45 years, Wirquin employees have pooled their imagination and creativity to design and manufacture innovative sanitary and plumbing equipment.

Their only aim is to enhance the performance of professionals and improve user comfort. They dare, experiment, and break codes to meet the challenge of more responsible and economical water management. They develop intelligent products that save time and space, and guarantee durable installations in water rooms.

Issues related to climate change and resource preservation are among the major concerns and are at the heart of Wirquin's development strategy.

Today more than ever, concrete action is needed to rethink and improve operations. Wirquin has redefined its strategy to make it more comprehensive and ambitious, with a common framework of objectives for the company in terms of Environmental Societal Responsibility (RSE) : **SMART FOR GOOD, THE PROMISE OF AN INGENIOUS AND SUSTAINABLE PRODUCT.**

SUPPORT FRAMES AND CISTERNS

TECHNICAL DUCT FRAME

The special Technical Duct Frame is compliant with the fire regulations and offers a cistern access by behind.

PRODUCT ADVANTAGES :

- > Smart Frame compatible with all installation.
- > Answer to the collectivity requirements.
- > Eco friendly, double anti condensation cistern wall (without polystyrene)
- > No needs to cut or measure the wc connectors and downpipe.
- > Certification NF. Supports 400 kg
- Compliant with fire regulations
- > Salt spray test Resistance to 200 hours

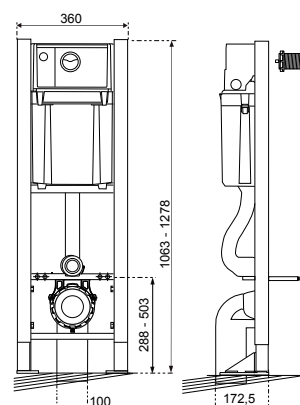

FEATURES :

- > Width of 36 cm
- > Opening at the back of the cistern
- > Innovative cistern with double insulating wall
- > Adapters for toilet pan connectors and flush pipes

TECHNICAL DUCT Frame

Reference	55721873
Ean-13 code	 3 375537 218004
Packaging	Box
Multiple / Boxed qty	01/01
Palettisation	10
Mounting	Wall and/or floor.
Structure	• Supports 400 kg • Anti corrosive protection • Salt spray Resistance test to 200 hours
Flush system	Dual-flush mechanism. Cable system 
Flush control plate	Button
Alimentation	• Servo valve 3/8 brass NF • Debt under 3 bars 8.8l /mn • Supports hard water
Adjustable pan height	370-580 mm (on finished floor)
Outlet connector	Elbow pipe (straight on demand)
Advantage product :	• double walled anti condensation cistern and ecological • Push button saled separately (drilling < 75 mm) • Easy access behind the cistern

> Option for a frame with straight outlet available upon request

Save time with the CHRONO FRAME

wirquin
Innovation

**TIME
SAVING**

The universal CHRONO support frame offers a solution compatible with all configurations (load-bearing wall or not). Designed to be clever and durable, the support frame is equipped with a pre-set cistern, a P-shaped flush pipe, and brakes on its feet. CHRONO is the fastest support frame to install on the market. For more flexibility in installation, the height can be lowered thanks to adjustable feet.

FEATURES :

- > Width of 36 cm
- > Opening at the back of the cistern
- > Innovative cistern with double insulating wall
- > Adapters for toilet pan connectors and flush pipes

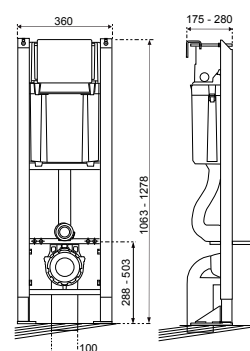

BENEFITS

- > Narrow support frame adaptable to all types of installation.
- > Time-saving.
- > Eco-friendly cistern with double anti-condensation wall (without polystyrene).
- > No measuring or cutting of toilet pan connectors and flush pipes required.
- > The installation of the UNIVERSAL SUPPORT FRAMES WIRQUIN CHRONO is twice as fast thanks to its pre-assembled components and intuitive installation. The support frame incorporates a brake system that allows for easy and quick height adjustment

Robust and clever, THE SMART ROCK FRAME

The SMART ROCK universal support frame complete pack offers a solution compatible with all types of installation (load-bearing wall or not). Quick to assemble, it provides easy access for maintenance. Moreover, the SMART ROCK support frame is a robust and cleverly designed product, equipped with a pre-adjusted tank and a swan-neck shaped drop tube to avoid cutting. The complete pack support frame includes both the Flush control plate and the toilet pan.

FEATURES

- > Width of 36 cm.
- > Cistern with PSE insulation.
- > SQUARE MATT CHROMED Dual flush plate.
- > Tool-free installation of the Flush control plate.
- > Large front access panel.
- > Height-adjustable toilet pan 40 > 52 cm.

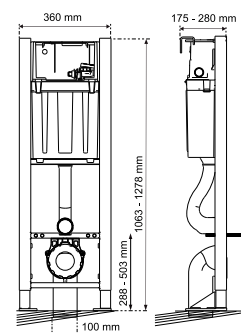

BENEFITS

- > Narrow support frame adapting to all types of installation
- > Long-lasting moisture and mold-resistant coating
- > Easy adjustment of the Flush control plate according to wall thickness
- > Easy access to the cistern
- > NF certification. Resists up to 400 kg
- > Toilet pan installation is quick and error-free: the WIRQUIN SMART ROCK support frame is equipped with a swan-neck shaped flush pipe to save time during toilet pan installation: no need to measure and cut the sleeve, just push it to adjust its length. Its flexible drain sleeve prevents any incorrect cutting during installation to the drain pipe.

WALK-IN SHOWER

Venisio **SO'LINE**

★★★
PATENTED

YEARS
GUARANTEE
10

Watch
video
Product
presentation

SO'LINE is an extra-flat linear channel dedicated to walk-in shower DIY renovation projects. This is the only channel with slope guides included to realize perfectly the 2% slope necessary for the flow of water to the channel!

Watch
video
Product
presentation

SO'LINE is easy and safe to install with adjustable feet. Its grid is adjustable for tiles ranging from 8 mm to 16 mm.

SO'LINE will provide users with great shower comfort thanks to its fast flow rate, patented anti-odor system, and modern grid made of stainless steel.

Installation Sealing: A self-adhesive butyl tape is included in the package, ensuring a watertight seal around the installation.

Save time with the ease of cleaning the **SO'LINE** channel.

PERFORMANCE

- > Easy creation of slopes for your shower channel
- > Easy and safe installation.
- > Stylish grid design.
- > No odor rising or water accumulation for maximum comfort.

ADVICE

- > For your safety, use only non-slip tiles suitable for Shower channel

FEATURES

- > Slope guides included that can be adjusted in length by clipping or cutting according to the chosen shower size (up to 160 x 90 cm) and adjustable in height with a floor fixing point to achieve the necessary 2% gradient for water drainage towards the channel.
- > 4 adjustable feet that can be fixed to the floor and two integrated levels facilitating proper positioning of the channel, along with a ready-to-use self-adhesive waterproofing mat.
- > Brushed stainless steel grid.
- > Fast flow rate of up to 33 L/min and patented anti-odor system.
- > Integrated level.

MAINTENANCE AND CLEANING ADVICE

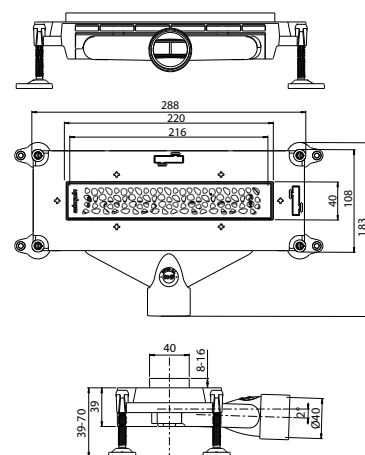

- > To protect your shower, do not use cleaning products or drain unblockers containing sulfuric acid or harsh chemicals in your shower channel.

Brushed stainless steel or black matt frame and grid, reversible tileable grid.

Brushed stainless steel

Black matt

3 LENGTHS AVAILABLE

300 mm, 500 mm and 700 mm.

wirquin
Innovation

SMART MEMBRANE TECHNOLOGY

The last generation Wirquin Cartridge replaces the traditional water trap. Patented, it is equipped with a new silicone membrane.

> **NO SMELLS:** the membrane opens when water passes and closes automatically afterwards. Its external bi-injected washer guarantee a perfect air-tightness. No more bad smells, no more pipes noises, no more desiphoning possible.

SMART
Membrane
Technology

> **EASY TO CLEAN:** the membrane and hair filter are removable for quick and easy cleaning with soap and water and for full access to the pipes.

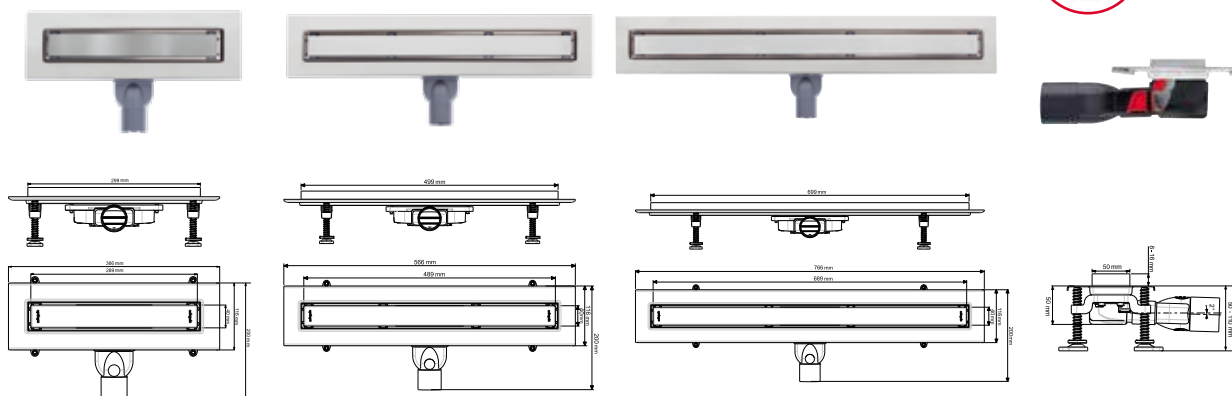

> **HAIR FILTER:** the new filter effectively traps all hair

SHOWER

SLIM+

The extra-flat shower waste!

Wirquin launches **SLIM⁺** the extra-flat shower waste and introduces the **SMART Membrane Technology**.* Quick and easy to install in all configurations, extra reliable without any risk of leaks and easy to clean, SLIM + is the guaranteed to meet all the installers and end-users expectations.

*Prevents
odours.*

*Eliminates noise
in the pipes.*

*Creates natural
ventilation in the
pipes and prevents
backsiphoning.*

BENEFITS

- > Extra compact, ideal for low profile shower trays.
- > Anti-odour thanks to the silicone membrane's cartridge.
- > Zero leaks thanks to the bi-injected washer under the shower tray.
- > Easy to clean thanks to the removable hair filter and the cartridge.

EXTRA COMPACT

*40mm = product height (without nut)

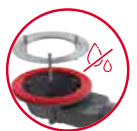

ANTI ODOUR

The silicone membrane lets the water through and block the bad smells.

Bi-injected washer

EXTRA RELIABLE

Bi-injected washer

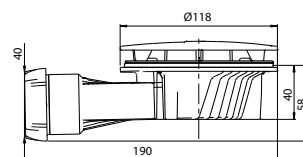

Removable cartridge for a deeper cleaning and a direct access to the pipes.

BATH

COBRA CABLE WASTES

with uncloggable trap

Complete waste for equipping bathtubs, including a waste, an overflow, and a compact uncloggable trap with a 50 mm water seal.

BENEFITS

- > Comfortable use without the risk of clogging
- > Effective against odor backflow
- > Allows rapid draining of the bathtub
- > Easy and quick to install in all configurations

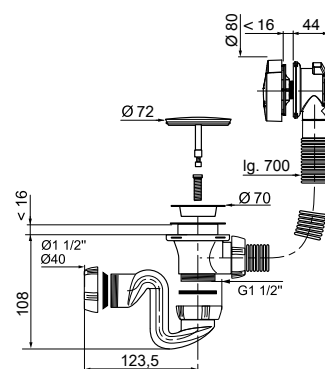

FEATURES

- > Complete waste with self-cleaning trap for equipping bathtubs
- > Trap with a 50 mm water seal and ultra-fast flow rate
- > Compact trap with a Ø40 compression outlet, adjustable horizontally and vertically

WIRQUIN NEO and WIRQUIN NEO AIR Zero leak trap!

Guaranteed zero leaks thanks to its bi-injected washers, Wirquin NEO AIR is safe, easy and quick to install.

Its innovative and patented function, AIR SYSTEM, allows the pipes to be ventilated, prevents the suction of the water seal and thus gets rid of noise in the pipes and bad smells backflow. Wirquin NEO AIR, it is the guarantee of a reliable and efficient installation and the end-users' comfort.

Made in
France

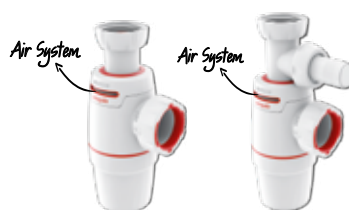

AIR
AIR SYSTEM

BENEFITS

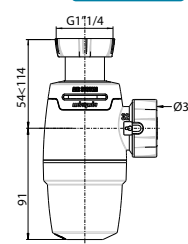

- > Allows the pipes to be ventilated : when a negative pressure is created in the pipework, the Wirquin NEO AIR's membrane rises, thus creating continual ventilation to prevent the suction of the water seal and thus noise in the pipes and bad smells backflow.

WIRQUIN NEO and WIRQUIN NEO AIR ZERO LEAK TRAP!

Made in
France

AIR
AIR SYSTEM

BENEFITS

> Allows the pipes to be ventilated : when a negative pressure is created in the pipework, the Wirquin NEO AIR's membrane rises, thus creating continual ventilation to prevent the suction of the water seal and thus get rid of noise in the pipes and bad smells backflow.

FLUSHING

The robust, reliable Dual Flush Valve for water saving

DISCOVER THE FLEXIFLOW

NEW

Thanks to the cable technology, the 3l/6l mechanism is easy and quick to install as it requires no height adjustment.

BENEFITS

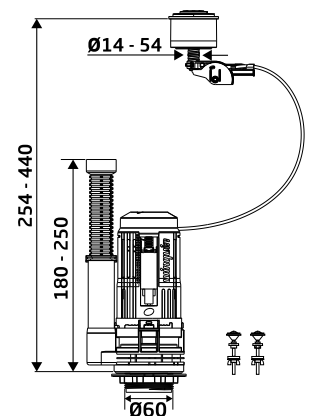

- > Water saving with a 3l/6l setting can save up to 21l / day / person, so to 30,000 liters per year for a family of 4.
- > No height adjustment required thanks to the cable for cisterns between 254 and 440 mm.
- > Patented EASY CLIP system for easy button attachment.
- > Adjustable water volume allows for increased water savings.
- > «LONGTIME» label certifying our commitment to the durability and reparability of our product.

FLEXIFLOW cable water saving dual Flush

NEW

Reference	10724824

Packaging	Box
Multiple / boxed qty	01/26
Cistern height	254 to 440 mm
Diam. of lid hole	Ø 14 to 54 mm
Actuator system	Cable
Main Features	▶ Easy Clip system for button : easy to install ▶ Water saving: mechanism 3l/6l. ▶ Automatically adjusts to the cistern height.

Flush mechanisms for renovation

Discover EASY

The EASY dual flush valve WIRQUIN is one of the easiest flush valves to install. Thanks to its patented system, the EASY attaches directly over existing close coupled installations without removing the cistern. The 3/6 L double flush technology allows for water savings. The flush mechanisms from WIRQUIN, the creator of this technology, are fully optimized and factory-set. The cable operated button is immediately installable without adjustment.

FEATURES

- > Patented system : universal base
- > Instant butyl sealing gasket
- > Cable button with Easy clip system
- > 3/6 L dual flush system

BENEFITS

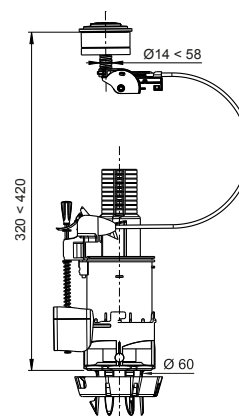

- > No need to remove the cistern to change the flush mechanism.
- > Perfect instant fixation.
- > No height adjustment required, quick installation and maintenance.
- > Water-saving

Main Features	► Automatically adjusts to the cistern height.	

MW00 water-saving mechanism with cable

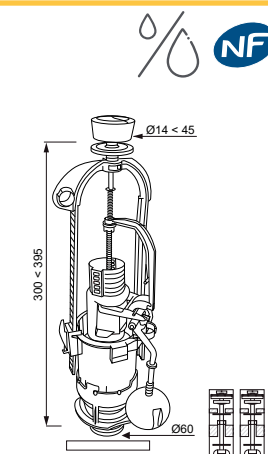

Reference	MWS00
Ean-13 code	 3 375536 024415
Packaging	Bag
Multiple / boxed qty	01/25
Cistern height	270 to 460 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Cable
Main Features	► Automatically adjusts to the cistern height.

MVB00 water-saving mechanism with stirrup

Reference	10724035
Ean-13 code	 3 375537 238699
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	300 to 395 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Stirrup
Main Features	► Locking mechanism using a bracket that secures the lid for increased safety and stability.

Installation in record time

Discover WIRQUIN ONE

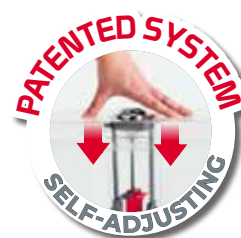

Thanks to its patented system, you can install the WIRQUIN ONE mechanism in record time.

FEATURES:

- > Patented system: self-adjusting bracket to cistern height.
- > Lid locking system.
- > Telescopic overflow : no cutting required
- > Easy push button
- > High flush flow rate: > 2.4 L/sec.

BENEFITS

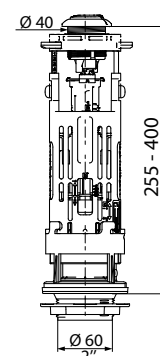

- > Automatic adjustment to the cistern height for easy installation,
- > no measuring or cutting required.
- > Locks the lid for increased safety and stability.
- > Consistent operating effort.
- > Water savings: a dual flush mechanism set to 3 liters for a partial flush and 6 liters for a full flush allows you to save up to 40,000 L of water per year compared to a single flush mechanism (for a family of 4). All WIRQUIN flush mechanisms, creator of this technology, are optimized and factory-set.

WIRQUIN ONE water-saving mechanism with stirrup

Reference	10723673
Ean-13 code	
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	255 to 400 mm
Diam. of lid hole	Ø 40 mm to Ø 54 mm Delivered with adjustment ring
Actuator system	Stirrup
Main Features	▶ Automatically adjusts to the cistern height. ▶ Telescopic overflow. ▶ High flush flow rate: > 2.4 L/ sec. ▶ Easy push button: only 16 N-m.

ADVICE

- ▶ A dual flush mechanism set to 3 liters for a half flush and 6 liters for a full flush can save you up to 30,000 liters of water per year (for a family of 4). All WIRQUIN flush mechanisms, the creator of this technology, are fully optimized and factory-set. However, finer adjustments of the Wirquin ONE are possible to reduce volumes if the bowl configuration allows.

100% Hygienic

Discover The Touchless

The TOUCHLESS is the most hygienic flush mechanism: it is triggered by infrared detection, thus avoiding any contact. It also allows complete control of water volumes: a brief pass over the detector will activate a half flush, while a longer pass will trigger the full 6L flush.

This flush system is also equipped with a designer button allowing manual activation if necessary.

Finally, this Cable mechanism is easy to install, requiring no adjustment and compensating for any alignment defects.

FEATURES

- > Contactless infrared detection button
- > Adjustable water volume in detection for 1/2 or full flush
- > Cable flush mechanism
- > Aesthetic button with manual backup activation

BENEFITS

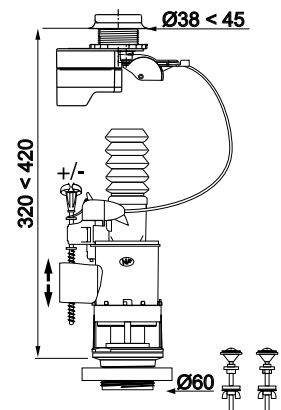

- > 100% hygienic
- > Water saving
- > Easy installation requiring no adjustment
- > Design & Safety
- > The TOUCHLESS flush mechanism is activated without any contact thanks to the Infrared detector: it's THE ideal solution against viruses and bacteria.

TOUCHLESS water-saving mechanism with cable

Reference	10723882
Ean-13 code	 3 375537 237258
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	320 to 420 mm
Diam. of lid hole	Ø 38 to 45 mm
Actuator system	Cable
Main Features	▶ Hands free flush. ▶ Intuitive: infrared detection. ▶ Water saving : just place your hand and the toilet flushes ; remove your hand and flush stops. ▶ Easy assembly: adjusts automatically thanks to the cable.

Take control of your water consumption

DISCOVER THE AQUACONTROL

AQUACONTROL is an interruptible single flush valve. It's now easy to manage your water consumption in toilets thanks to WIRQUIN's AQUACONTROL mechanism. A simple press of the button allows you to start or interrupt the flush. With WIRQUIN solutions, it's now possible to control your environmental impact. The AQUACONTROL is a solution that allows you to install a water-saving mechanism where it's not possible to install a dual flush system.

FEATURES

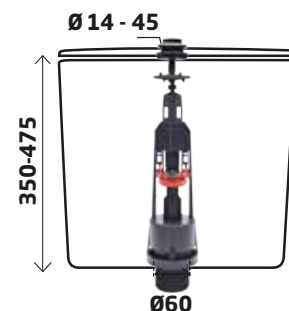

- > The AQUACONTROL mechanism has an interruptible function that allows water savings. A simple press of the button starts the flush, and it's possible to interrupt the flush at the right time by pressing the button again.
- > Compact
- > Tested for 200,000 cycles

AQUACONTROL interruptible water saving

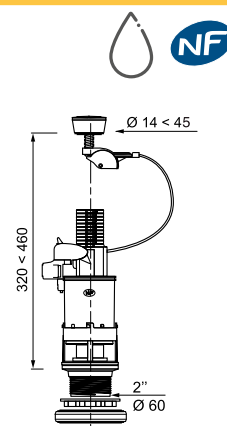

Reference	10723886
Ean-13 code	 3 375537 237289
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	350 to 475 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Plate
Main Features	► The Aquacontrol flush mechanism is interruptible : flush by pushing the button, push again in order to stop the flush when you wish. Means water economy.

MD with cable

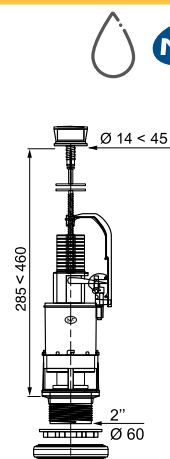

Reference	MD+00
Ean-13 code	 3 375530 274083
Packaging	Bag
Multiple / boxed qty	01/21
Cistern height	320 to 460 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Cable
Main Features	► Automatically adjusts to the cistern height.

MP00 with mechanical control

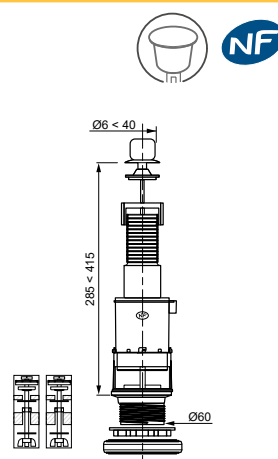

Reference	10724082
Ean-13 code	 3 375537 239146
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	285 to 460 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Plate
Main Features	► The mechanism is separate from the lid so lid can be lifted without disassembly. ► Compensates for misalignment.

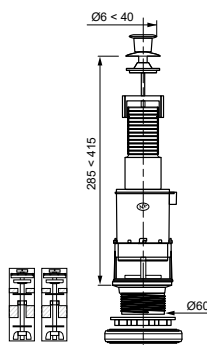

MX with pull rod

CHROMED PULL	
Reference	10724081
Ean-13 code	 3 375537 239139
Packaging	Box
Multiple / boxed qty	01/10
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Main Features	► Automatic adjustment, no cutting required.

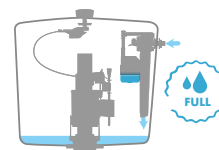

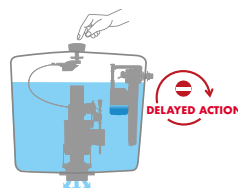

WHITE PULL	
Reference	10724084
Ean-13 code	 3 375537 239160
Packaging	Bag
Multiple / boxed qty	01/20
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Main Features	► Automatic adjustment, no cutting required.

Smart fill

Discover the JOLLYFILL

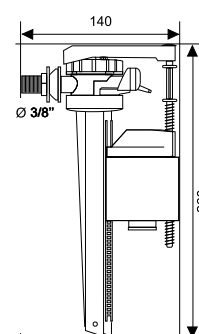

The smart float can delay tank filling for optimum efficiency. Thanks to its delayed action technology, it only releases water when the mechanism is fully closed. This saves up to 6L of water per day (for a family of 4).

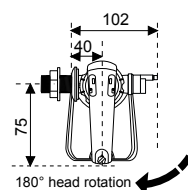

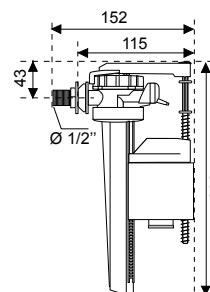

JOLLYFILL

	3/8" BRASS	
Reference	10723581	16300001
Ean-13 code		
Packaging	Box	Bag
Multiple / boxed qty	01/10	01/36
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	8,4 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.	
Water level adjustment	By screw.	
Main Features	▶ 180° rotating head. ▶ Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (13 dbA). ▶ Delayed action: water saving.	

	1/2" PLASTIC	
Reference	16300101	
Ean-13 code		
Packaging	Bag	
Multiple / boxed qty	01/36	
Fitting	1/2" plastic	
Type of float valve	Servo-valve	
Flow rate at 3 bars	8,4 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.	
Water level adjustment	By screw.	
Main Features	▶ 180° rotating head. ▶ Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (17 dbA). ▶ Delayed action: water saving.	

	1/2" BRASS	
Reference	16300201	
Ean-13 code		
Packaging	Bag	
Multiple / boxed qty	01/36	
Fitting	1/2" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	8,4 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.	
Water level adjustment	By screw.	
Main Features	▶ 180° rotating head. ▶ Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (17 dbA). ▶ Delayed action: water saving.	

The double inlet valve

Discover the DOBLO

The DOBLO float valve, thanks to its ingenious convertible connection system, is suitable for cisterns with side or bottom water inlets. Moreover, the hightech design saves up to 6L of water per day (for a family of 4).

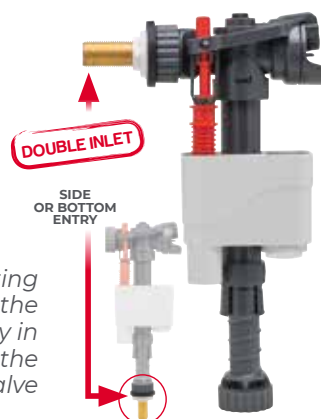

PRODUCT ADVANTAGES

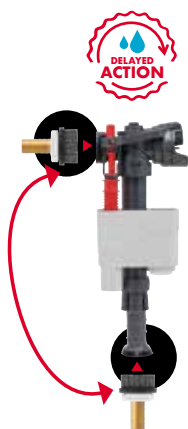

- > DOUBLE INLET: adapts to all types of cistern (side and bottom entry).
- > WATER SAVINGS: delayed action.
- > ROBUST: 3/8" brass fitting.
- > EASY TO ADJUST: telescopic valve adapts to all cistern heights (from 235 mm to 315 mm). Water level adjustment by screw.
- > FAST FILL: 6L in 39s at 3 bars.
- > Works at low and high pressure from 0.2 to 16 bars. Withstands pressure spikes up to 20 bars

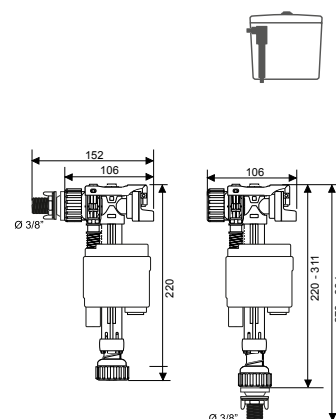

The 3/8" brass fitting allows connection to the cistern's water supply in two different ways on the float valve

DOBLO 3/8" brass

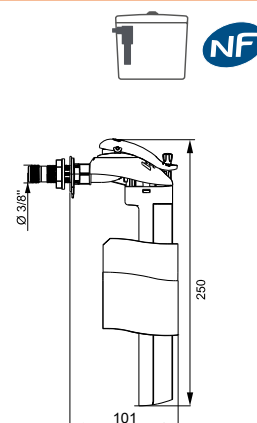

Reference	10723731	10722273
Ean-13 code		
Packaging	Box	Bag
Multiple / boxed qty	01/10	01/30
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	11,1 L/mn (side entry). 10,1 L/mn (bottom entry).	
Operating range	0,2 to 16 bars. Withstands pressure spikes to 16 bars.	
Water level adjustment	By screw.	
Main Features	► Adaptable. ► Telescopic. ► Delayed action.	

F90 3/8" brass

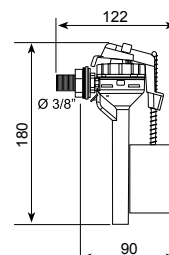

Reference	10724032	F90
Ean-13 code		
Packaging	Box	Bag
Multiple / boxed qty	01/21	01/60
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	7,5 L/mn	
Operating range	0,5 to 10 bars. Withstands pressure spikes to 20 bars.	
Water level adjustment	By screw.	
Main Features	► Compact.	

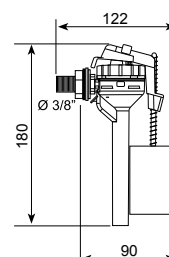

TOPY

	3/8" BRASS	
Reference	10723594	16300501
Ean-13 code	 3 375537 234516	 3 375537 161140
Packaging	Box	Bag
Multiple / boxed qty	01/18	01/40
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	7,9 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars	
Water level adjustment	By screw.	
Main Features	► Ultra-compact.	

	3/8" PLASTIC	
Reference	10724587	
Ean-13 code	 3 375537 244072	
Packaging	Bag	
Multiple / boxed qty	01/30	
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	7,9 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars	
Water level adjustment	By screw.	
Main Features	► Ultra-compact.	

	1/2" PLASTIC	
Reference	16300601	
Ean-13 code	 3 375537 160815	
Packaging	Bag	
Multiple / boxed qty	01/60	
Fitting	1/2" plastic	
Type of float valve	Servo-valve	
Flow rate at 3 bars	7,9 L/mn	
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.	
Water level adjustment	By screw.	
Main Features	► Ultra-compact.	

F89 3/8" brass

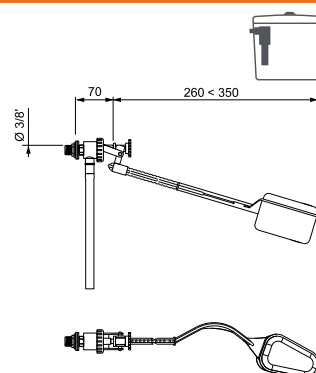

Reference	10724127	10718522
Ean-13 code	 3 375537 239573	 3 375537 184804
Packaging	Box	Bag
Multiple / boxed qty	01/10	01/42
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	10,6 L/mn	
Operating range	0,3 to 10 bars	
Water level adjustment	By screw.	
Main Features	► Compact. ► Side entry.	

F80 lever 3/8" brass

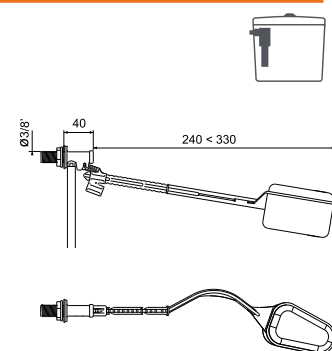

Reference	10724087	
Packaging	Bag	
Multiple / boxed qty	01/36	3 375537 239191
Fitting	3/8" brass	
Type of float valve	Lever	
Flow rate at 3 bars	9,3 L/mn	
Operating range	0,1 to 10 bars.	
Water level adjustment	Adjustment of waterlevel with scroll wheel.	
Main Features	► Copes with water containing impurities.	

F12 lever 3/8" plastic

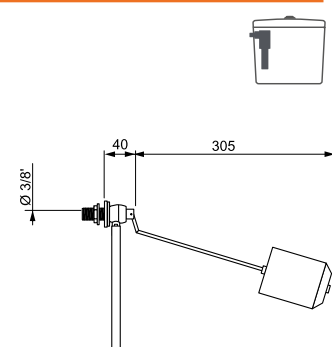

Reference	10724088	
Packaging	Bag	
Multiple / boxed qty	01/40	3 375537 239207
Fitting	3/8" plastic	
Type of float valve	Lever	
Flow rate at 3 bars	5,5 L/mn	
Operating range	0,1 to 14 bars.	
Water level adjustment	2 water level settings available.	
Main Features	► Copes with water containing impurities.	

F2 lever 3/8" brass

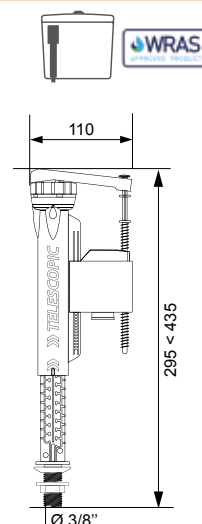

Reference	10724137	
Packaging	Bag	
Multiple / boxed qty	01/35	3 375537 239672
Fitting	3/8" brass	
Type of float valve	Lever	
Flow rate at 3 bars	9 L/mn	
Operating range	0,1 to 16 bars.	
Water level adjustment	By screw.	
Main Features	► Copes with water containing impurities.	

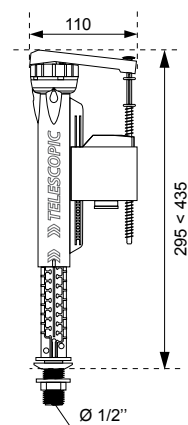

JOLLYFILL telescopic

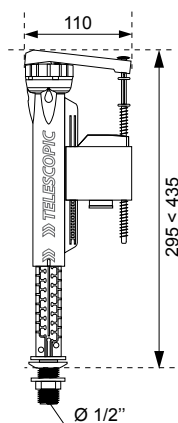

3/8" BRASS	
Reference	10723588
Ean-13 code	 3 375537 234455
Packaging	Box
Multiple / boxed qty	01/10
Fitting	3/8" brass
Type of float valve	Servo-valve
Flow rate at 3 bars	9,3 L/mn
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.
Water level adjustment	By screw.
Main Features	► Telescopic: adjusts to the height of the cistern in just seconds. ► Very quiet. ► Locks in place. ► Delayed action: water saving.

1/2" BRASS	
Reference	16110201
Ean-13 code	 3 375537 150434
Packaging	Bag
Multiple / boxed qty	01/36
Fitting	1/2" laiton
Type of float valve	Servo-valve
Flow rate at 3 bars	11,6 L/mn
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.
Water level adjustment	By screw.
Main Features	► Telescopic: adjusts to the height of the cistern in just seconds. ► Very quiet. ► Locks in place. ► Delayed action: water saving.

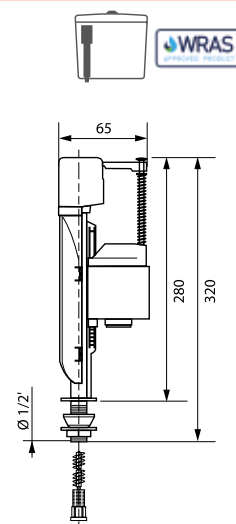

1/2" PLASTIC	
Reference	16110101
Ean-13 code	 3 375537 151691
Packaging	Bag
Multiple / boxed qty	01/36
Fitting	1/2" plastic
Type of float valve	Servo-valve
Flow rate at 3 bars	11,6 L/mn
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.
Water level adjustment	By screw.
Main Features	► Telescopic: adjusts to the height of the cistern in just seconds. ► Very quiet. ► Delayed action: water saving.

JOLLYFILL fixed

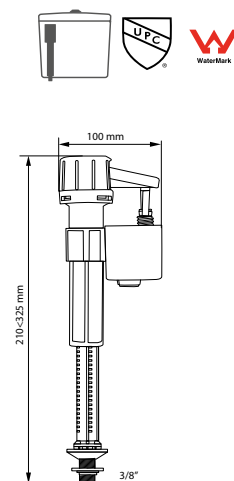

1/2" PLASTIC	
Reference	16100006
Ean-13 code	 3 375537 136759
Packaging	Bag
Multiple / boxed qty	01/36
Fitting	1/2" plastic
Type of float valve	Servo-valve
Débit	4,1 L/mn to 0,1 bars
Operating range	0,1 to 16 bars. Withstands pressure spikes to 20 bars.
Water level adjustment	By screw.
Main Features	► Quiet (17 decibels). ► Delayed action: water saving.

F50 3/8" brass

Reference	10724128	10720231
Ean-13 code	 3 375537 239580	 3 375537 201549
Packaging	Box	Bag
Multiple / boxed qty	01/10	01/35
Fitting	3/8" brass	
Type of float valve	Servo-valve	
Flow rate at 3 bars	10 L/mn	
Operating range	0,5 to 10 bars.	
Water level adjustment	By screw.	
Main Features	► Telescopic: adjusts to the height of the cistern in just seconds. ► Compact.	

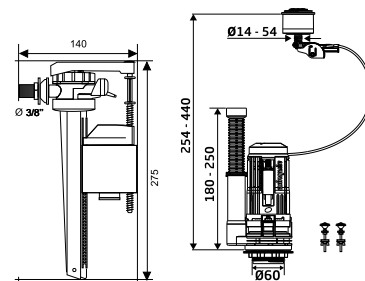

FLEXIFLOW water-saving cable mechanism + JOLLYFILL valve

NEW

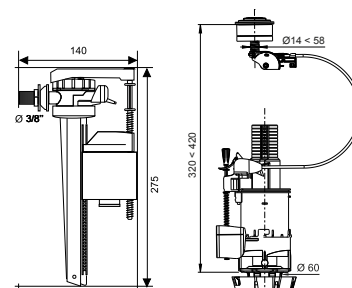

Reference	10724825	 3 375537 246359
Packaging	Box	
Multiple / boxed qty	01/12	
Cistern height	254 to 440 mm	
Diam. of lid hole	14 to 54 mm	
Actuator system	Cable	
Float valve	▶ Servo-valve. ▶ 180° rotating head (patent). Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (classe 1). ▶ Delayed action: water saving.	
Main Features	▶ Easy Clip system for button : easy to install ▶ Water saving: mécanisme 3l/6l ▶ Automatically adjusts to the cistern height.	

EASY water-saving cable mechanism + JOLLYFILL valve

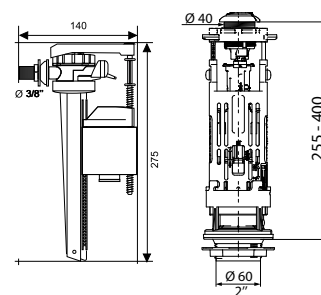

Reference	10724144	 3 375537 239740
Packaging	Box	
Multiple / boxed qty	01/06	
Cistern height	320 to 420 mm	
Diam. of lid hole	14 to 58 mm	
Actuator system	Cable	
Float valve	▶ Servo-valve. ▶ 180° rotating head (patent). Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (classe 1). ▶ Delayed action: water saving.	
Main Features	▶ Ultra-fast installation: no need to remove the tank. ▶ Water saving: mécanisme 3l/6l. ▶ Automatically adjusts to the cistern height.	

WIRQUIN ONE water-saving stirrup mechanism + JOLLYFILL valve

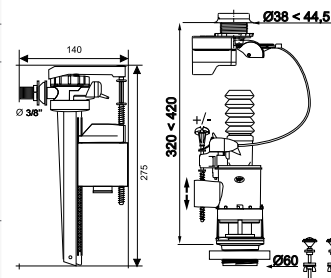

Reference	10723589	 3 375537 234462
Packaging	Box	
Multiple / boxed qty	01/06	
Cistern height	255 to 400 mm	
Diam. of lid hole	Ø 40 mm to Ø 54 mm Delivered with adjustment ring	
Actuator system	Stirrup	
Float valve	▶ Servo-valve. ▶ 180° rotating head. Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (classe 1). ▶ Fitting 3/8 laiton. ▶ Delayed action : water saving.	
Main Features	▶ Automatically adjusts to the cistern height. ▶ Telescopic overflow. ▶ High flush flow rate: > 2.4 L/ sec. ▶ Easy push button : only 16 N-m (Newton).	

TOUCHLESS water-saving cable mechanism + JOLLYFILL valve

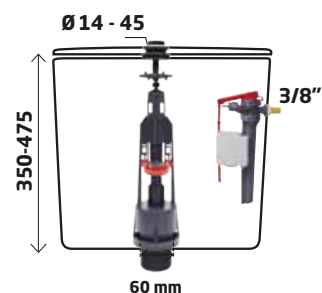

Reference	10723884	
Packaging	Box	
Multiple / boxed qty	01/06	3 375537 237272
Cistern height	320 to 420 mm	
Diam. of lid hole	38 to 44,5 mm	
Actuator system	Cable	
Float valve	▶ Servo-valve. ▶ 180° rotating head (patent). Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (classe 1). ▶ Delayed action: water saving.	
Main Features	▶ Hands free flush. ▶ Intuitive: infrared detection. ▶ Water saving : just place your hand and the toilet flushes ; remove your hand and flush stops. ▶ Easy assembly: adjusts automatically thanks to the cable.	

AQUACONTROL water saving interruptible + JOLLYFILL valve

Reference	10723887	
Packaging	Box	
Multiple / boxed qty		3 375537 237296
Cistern height	350 to 475 mm	
Diam. of lid hole	14 to 45 mm	
Actuator system	Plate	
Float valve	▶ Servo-valve. ▶ 180° rotating head (patent). Ideal for narrow ceramic cisterns (patent). ▶ Very quiet (classe 1). ▶ Delayed action: water saving.	
Main Features	▶ The Aquacontrol flush mechanism is interruptible : flush by pushing the button, push again in order to stop the flush when you wish. Means water economy	

AQUACONTROL water saving interruptible + F90 valve

Reference	10724042	
Packaging	Box	
Multiple / boxed qty	01/06	3 375537 238743
Cistern height	350 to 475 mm	
Diam. of lid hole	14 to 45 mm	
Actuator system	Plate	
Float valve	▶ Servo-valve. ▶ Fitting 3/8" brass	
Main Features	▶ The Aquacontrol flush mechanism is interruptible : flush by pushing the button, push again in order to stop the flush when you wish. Means water economy

Cistern height	285 to 460 mm	
Diam. of lid hole	14 to 45 mm	
Actuator system	Plate	
Float valve	► 3/8" brass fitting. ► Lever, Adjustment of waterlevel with scroll wheel. ► Copes with water containing impurities.	
Main Features	► The mechanism is separate from the lid so lid can be lifted without disassembly. ► Compensates for misalignment.	

MP plate mechanism + F12 valve

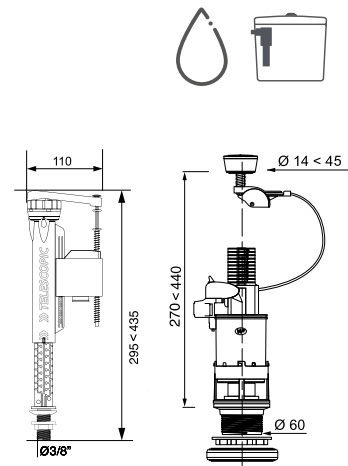

Reference	12030401
Ean-13 code	
Packaging	Bag
Multiple / boxed qty	01/23
Cistern height	285 to 460 mm
Diam. of lid hole	14 to 46 mm
Actuator system	Plate
Float valve	► 3/8" plastic fitting . ► 2 water level adjustments possible. ► Copes with water containing impurities.
Main Features	► The mechanism is separate from the lid so lid can be lifted without disassembly. ► Compensates for misalignment.

MD cable mechanism + JOLLYFILL telescopic valve

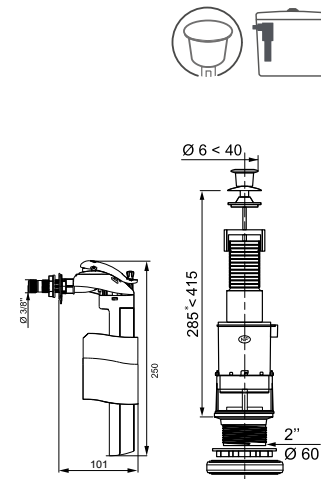

Reference	10719653
Ean-13 code	
Packaging	Bag
Multiple / boxed qty	01/15
Cistern height	270 to 440 mm
Diam. of lid hole	14 to 45 mm
Actuator system	Cable
Float valve	► Telescopic. ► 3/8" brass fitting. ► Bottom entry.
Main Features	► Automatically adjusts to the cistern height.

MX pull mechanism + F90 valve

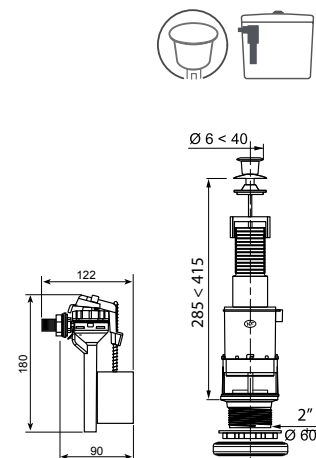

Reference	10724750
Ean-13 code	
Packaging	Bag
Multiple / boxed qty	01/12
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	► Servo-valve. ► 3/8" brass fitting.
Main Features	► Automatic adjustment, no cutting required.

MX pull mechanism + TOPY valve

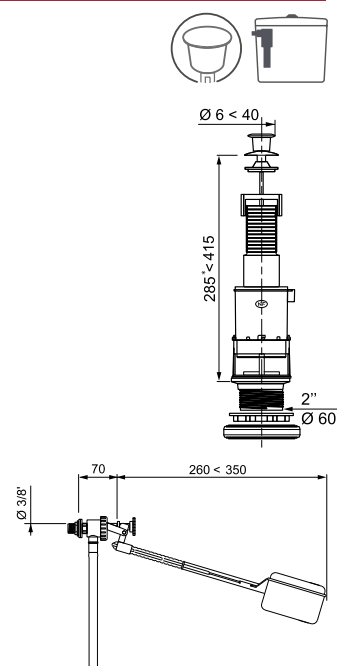

Reference	10717887
Ean-13 code	
Packaging	Bag
Multiple / boxed qty	01/18
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	► Servo-valve. ► 3/8" plastic fitting.
Main Features	► Automatic adjustment, no cutting required.

MX pull mechanism + F80 valve

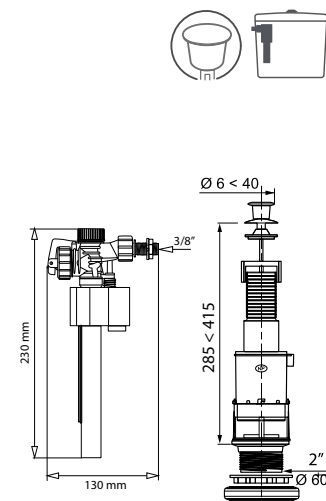

Reference	10724083
Ean-13 code	 3 375537 239153
Packaging	Box
Multiple / boxed qty	01/06
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	▶ 3/8" brass fitting. ▶ Lever, Adjustment of waterlevel with scroll wheel. ▶ Copes with water containing impurities.
Main Features	▶ Automatic adjustment, no cutting required.

Pull mechanism + F89 valve

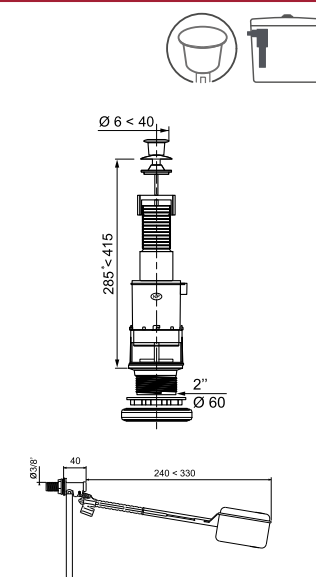

Reference	10120001
Ean-13 code	 3 375537 129591
Packaging	Bag
Multiple / boxed qty	01/15
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	▶ Compact. ▶ 3/8" brass fitting. ▶ Withstands pressure spikes to 16 bars.
Main Features	▶ Automatic adjustment, no cutting required.

MX pull mechanism + F12 valve

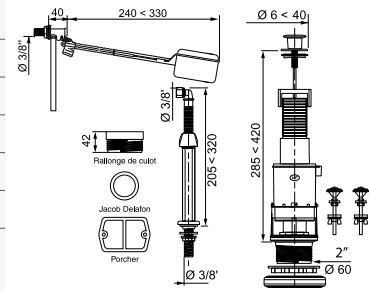

Reference	10724085	MC+12
Ean-13 code	 3 375537 239177	 3 375530 261489
Packaging	Bag	Bag
Multiple / boxed qty	01/14	01/23
Cistern height	285 to 415 mm	
Diam. of lid hole	6 to 40 mm	
Actuator system	Pull rod	
Float valve	▶ Lever. ▶ 3/8" plastic fitting. ▶ Copes with water containing impurities.	
Main Features	▶ Automatic adjustment, no cutting required.	

MX renovation pull mechanism + PORCHER and DELAFON F12 valve

Reference	10724086
Ean-13 code	 3 375537 239184
Packaging	Bag
Multiple / boxed qty	01/10
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	▶ Lever ▶ 3/8" plastic fitting . ▶ Copes with water containing impurities.
Main Features	▶ A complete solution for renovation

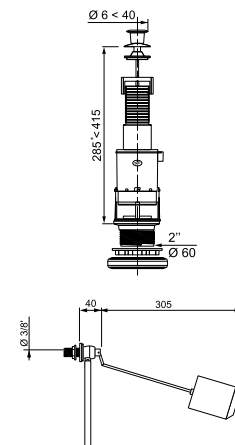

* NF Certification for the mechanism only

MX pull mechanism + F2 valve

Reference	MX02
Ean-13 code	 3 375530 300089
Packaging	Bag
Multiple / boxed qty	01/12
Cistern height	285 to 415 mm
Diam. of lid hole	6 to 40 mm
Actuator system	Pull rod
Float valve	▶ Lever. ▶ 3/8" brass fitting. ▶ Copes with water containing impurities.
Main Features	▶ Automatic adjustment, no cutting required.

EXTENDABLE ELBOW PIPES

Combined advantages

The EXTENDABLE ELBOW PIPES fit all configurations.

PRODUCT ADVANTAGES

- > Fits all configurations.
- > Maintains the desired shape and slope.
- > Extendable from 230 to 390 mm.
- > Universal connection.
- > Special drainage + design: no water remains in the outlet so there is no risk of leaks.
- > Rigid section in ABS, solvent-weldable.
- > 2 versions available: with or without spigot.
- > Metal-reinforced duct.

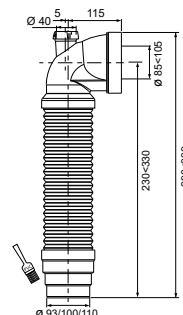

EXTENDABLE ELBOW solvent weld

	with metal reinforcement without spigot

UNIVERSAL MAGICFLEX

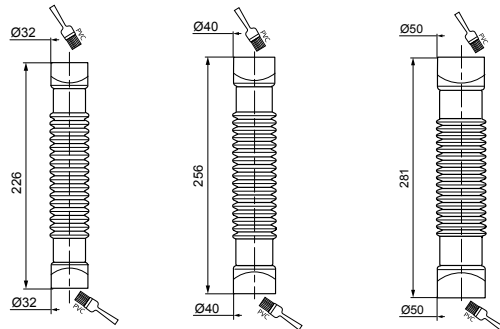

A single product for all your needs

The standard product is Female - Female but can be changed to Male - Female by cutting one end or Male - Male by cutting both ends of the Magicflex.

PRODUCT ADVANTAGES

- > Flexible.
- > 1 single model instead of 3.
- > No need for corner calculations.
- > Solvent weld.

Packaging	Bulk
Multiple / Boxed qty	05/50
Features	Ø32 mm female Can be cut to Ø32 mm male

Ø40	
Reference	79011001
Ean-13 code	 3 375539 042058
Packaging	Bulk
Multiple / Boxed qty	05/30
Features	Ø40 mm female Can be cut to Ø40 mm male

Ø50	
Reference	79013001
Ean-13 code	 3 375539 042423
Packaging	Bulk
Multiple / Boxed qty	05/15
Features	Ø50 mm female Can be cut to Ø50 mm male

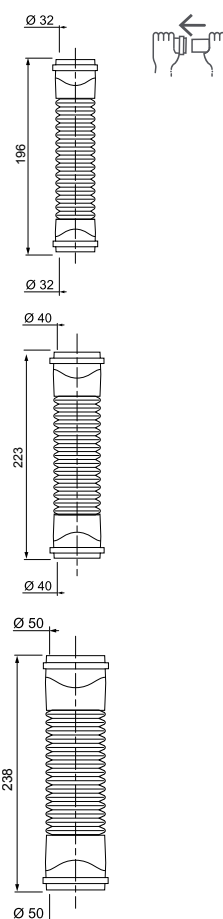

Female - Female Push-Fit MAGICFLEX

Ø32	
Reference	79019001
Ean-13 code	 3 375539 057892
Packaging	Bulk
Multiple / Boxed qty	10/120

Ø40	
Reference	79020001
Ean-13 code	 3 375539 057939
Packaging	Bulk
Multiple / Boxed qty	10/70

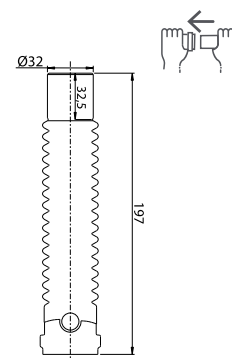

Ø50	
Reference	79021001
Ean-13 code	 3 375539 057946
Packaging	Bulk
Multiple / Boxed qty	08/48

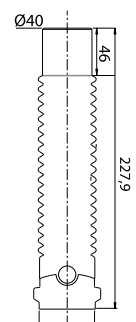

Male - Female Push-Fit MAGICFLEX

	Ø 32
Reference	79019011
Ean-13 code	 3 375537 147168
Packaging	Bulk
Multiple / Boxed qty	10/120

	Ø 40
Reference	79020011
Ean-13 code	 3 375537 147267
Packaging	Bulk
Multiple / Boxed qty	10/70

	Ø 50
Reference	79021011
Ean-13 code	 3 375537 147274
Packaging	Bulk
Multiple / Boxed qty	08/48

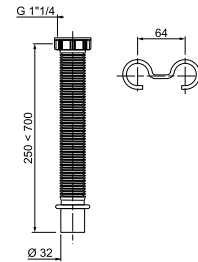

EXTENDABLE CONNECTORS

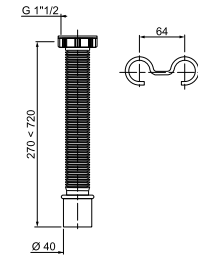

> Can be used as a trap thanks to its provided retention hook

	1"1/4 - Ø 32 MM MALE
Reference	30723127
Ean-13 code	 3 375537 230075
Packaging	Bag
Multiple / Boxed qty	01/60
Length	250 to 700 mm

	1"1/2 - Ø 40 MM MALE
Reference	30723134
Ean-13 code	 3 375537 230143
Packaging	Bag
Multiple / Boxed qty	01/30
Length	270 to 720 mm

	1"1/4 - Ø 40 MM MALE
Reference	73140001
Ean-13 code	 3 375536 033585
Packaging	Bag
Multiple / Boxed qty	01/65
Length	270 to 720 mm

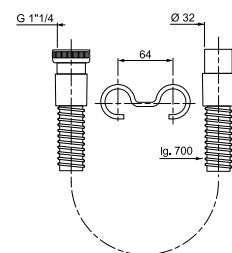

White PVC CONNECTORS

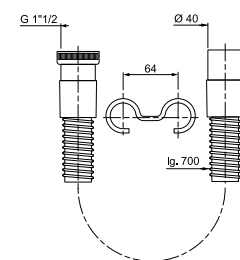

> Can be used as a trap thanks to its provided retention hook

	Ø 32 MM
Reference	30724719
Ean-13 code	 3 375537 245390
Packaging	Bag
Multiple / Boxed qty	01/15
Length	700 mm
Inlet - outlet	1"1/4 - Ø 32 mm male

	Ø 40 MM
Reference	30724007
Ean-13 code	 3 375537 238422
Packaging	Bag
Multiple / Boxed qty	01/20
Length	700 mm
Inlet - outlet	1"1/2 - Ø 40 mm male

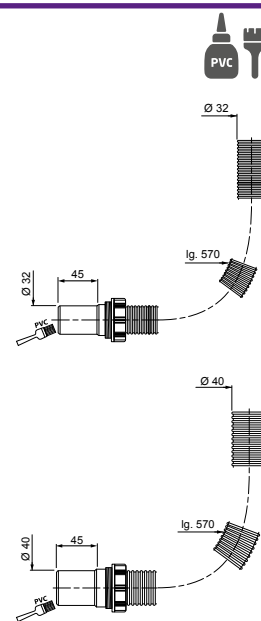

Ribbed CONNECTORS

	Ø 32 MM MALE 1"1/4	
Reference	SP9300	7930003
Ean-13 code	 3 375530 117212	 3 375536 017639
Packaging	Bag	Bulk with link
Multiple / Boxed qty	01/50	01/40
Length	570 mm	

	Ø 40 MM MALE 1"1/2	
Reference	79301001	
Ean-13 code	 3 375536 017615	
Packaging	Bulk with link	
Multiple / Boxed qty	01/40	
Length	570 mm	

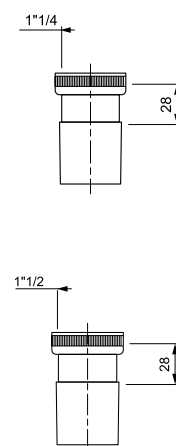

Brass nut CONNECTORS

	Ø 32 MM	
Reference	30724292	
Ean-13 code	 3 375537 241194	
Packaging	Bag	
Multiple / Boxed qty	01/30	

	Ø 40 MM	
Reference	30724293	
Ean-13 code	 3 375537 241200	
Packaging	Bag	
Multiple / Boxed qty	01/90	

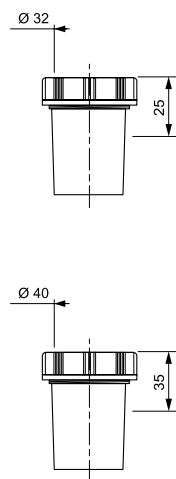

Females Screw fit ENDS

	Ø 32 MM	
Reference	30724287	
Ean-13 code	 3 375537 241149	
Packaging	Bag	
Multiple / Boxed qty	01/100	

	Ø 40 MM	
Reference	30724288	
Ean-13 code	 3 375537 241156	
Packaging	Bag	
Multiple / Boxed qty	01/80	

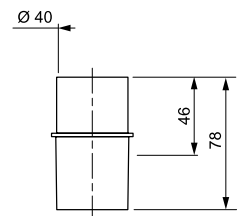

FEMALE solvent weld ENDS

	Ø 32 MM
Reference	30724294
Ean-13 code	 3 375537 24 1217
Packaging	Bag
Multiple / Boxed qty	01/100

	Ø 40 MM
Reference	30724295
Ean-13 code	 3 375537 24 1224
Packaging	Bag
Multiple / Boxed qty	01/110

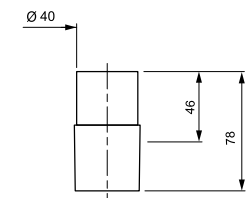

MALE solvent weld ENDS

	Ø 32 MM
Reference	30724297
Ean-13 code	 3 375537 24 1248
Packaging	Bag
Multiple / Boxed qty	01/50

	Ø 40 MM
Reference	30724296 SP9347
Ean-13 code	 3 375537 24 1231  3 375536 02 3852
Packaging	Bag Bag
Multiple / Boxed qty	01/50 01/200

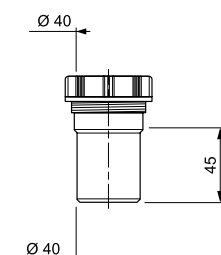

Straight CONNECTORS for ribbed connectors

	Ø 32 MM
Reference	30724310
Ean-13 code	 3 375537 24 1378
Packaging	Bag
Multiple / Boxed qty	01/60

	Ø 40 MM
Reference	30724302
Ean-13 code	 3 375537 24 1293
Packaging	Bag
Multiple / Boxed qty	01/50

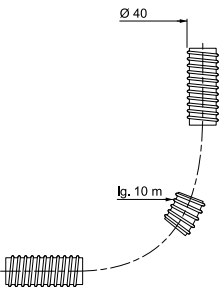

Spiral CONNECTORS L10 m

	Ø 32	
Reference	79330004	79330001
Ean-13 code		
Packaging	Box	Film
Multiple / Boxed qty	01/01	01/05

	Ø 40	
Reference	79331005	79331001
Ean-13 code		
Packaging	Box	Film
Multiple / Boxed qty	01/01	01/05

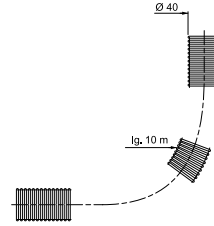

RIBBED CONNECTORS

	Ø 32 - LENGTH 10 M
Reference	SP9132
Ean-13 code	 3 375530 117618
Packaging	Bulk
Multiple / Boxed qty	01/01

	Ø 40 - LENGTH 10 M
Reference	SP9140
Ean-13 code	 3 375530 117717
Packaging	Bulk
Multiple / Boxed qty	01/01

	Ø 32 - LENGTH 1,5 M
Reference	30718976
Ean-13 code	 3 375537 189144
Packaging	Bulk
Multiple / Boxed qty	01/18

	Ø 40 - LENGTH 1,5 M
Reference	30718977
Ean-13 code	 3 375537 189151
Packaging	Bulk
Multiple / Boxed qty	01/14

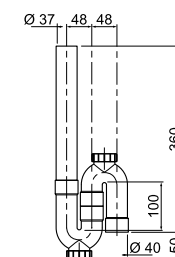

SINGLE NECK TRAPS

	HORIZONTAL OUTLET
Reference	30724286
Ean-13 code	 3 375537 241132
Packaging	Bag
Multiple / Boxed qty	01/25
Access cap	Yes

	VERTICAL OUTLET
Reference	30724301
Ean-13 code	 3 375537 241286
Packaging	Bag
Multiple / Boxed qty	01/15
Access cap	Yes

Double neck PVC TRAPS, solvent weld - horizontal outlet

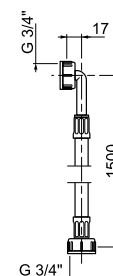

Reference	SP5003
Ean-13 code	 3 375530 113016
Packaging	Bag
Multiple / Boxed qty	01/35

Inlet HOSE 1.50 m 20/27

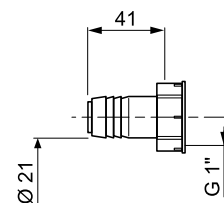

Reference	39470002
Ean-13 code	 3 375536 034834
Packaging	Bag
Multiple / Boxed qty	01/40

Straight washing machine CONNECTOR

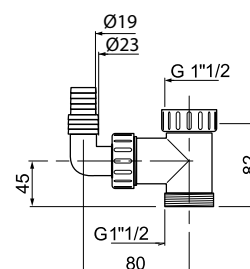

Reference	30724006
Ean-13 code	 3 375537 238415
Packaging	Bag
Multiple / Boxed qty	01/55

1½" - 1½" BENT washing machine CONNECTOR

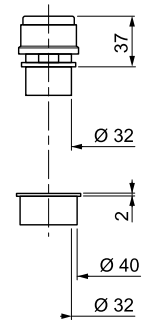

Reference	SP9431S
Ean-13 code	 3 375536 021834
Packaging	Bag with header
Multiple / Boxed qty	01/50

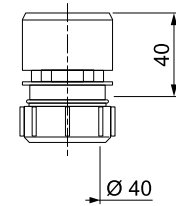

Straight VENTA PIPES for vertical installation

	Ø32 OR Ø40 MM SOLVENT WELD		
Reference	70723710	79015002	VP15
Ean-13 code			
Packaging	Bag	Bag with header	Bulk
Multiple / Boxed qty	01/250	01/32	01/250

	Ø40 MM SCREW FIT	
Reference	70724299	79025002
Ean-13 code		
Packaging	Bag	Bag with header
Multiple / Boxed qty	01/50	01/50

	Ø40 MM SCREW FIT OR Ø50 MM SOLVENT WELD
Reference	VP35
Ean-13 code	
Packaging	Bulk
Multiple / Boxed qty	01/100

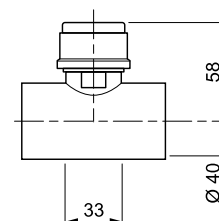

T-shaped VENTA PIPES for horizontal installation

	Ø32 MM SOLVENT WELD	
Reference	70724300	79016002
Ean-13 code		
Packaging	Bag	Bag with header
Multiple / Boxed qty	01/30	01/40

	Ø40 MM SOLVENT WELD	
Reference	70724298	79017002
Ean-13 code		
Packaging	Bag	Bag with header
Multiple / Boxed qty	01/60	01/20

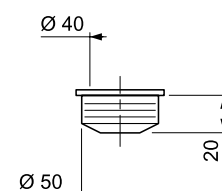

Pipe CONNECTOR

Ø 40 MM X Ø 32 MM	
Reference	30724304
Ean-13 code	 3 375537 241316
Packaging	Bag
Multiple / Boxed qty	01/200

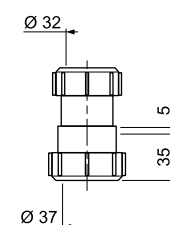

Ø 50 MM X Ø 40 MM	
Reference	30724308
Ean-13 code	 3 375537 241354
Packaging	Bag
Multiple / Boxed qty	01/90

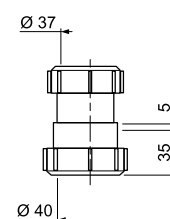

Pipe CONNECTOR

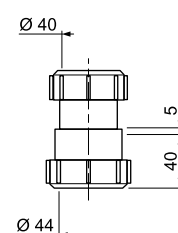

COMPRESSION FITTING Ø 32 - Ø 37 MM	
Reference	SP9292S
Ean-13 code	 3 375536 014171
Packaging	Bag with header
Multiple / Boxed qty	01/60

COMPRESSION FITTING Ø 37 - Ø 40 MM	
Reference	SP9293S
Ean-13 code	 3 375536 014164
Packaging	Bag with header
Multiple / Boxed qty	01/50

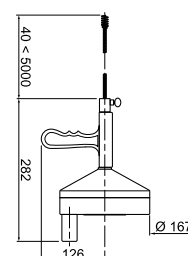

COMPRESSION FITTING Ø 40 - Ø 44 MM	
Reference	SP9296S
Ean-13 code	 3 375536 021704
Packaging	Bag with header
Multiple / Boxed qty	01/50

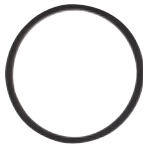

DRAIN SNAKE

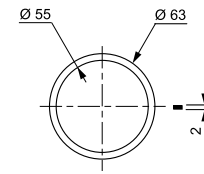

Reference	SP9910
Ean-13 code	 3 375530 165213
Packaging	Bulk
Multiple / Boxed qty	01/08

Trap base WASHER

	63 X 55 X 2 MM
Reference	30724265
Ean-13 code	 3 375537 240920
Packaging	Bag
Multiple / Boxed qty	01/300

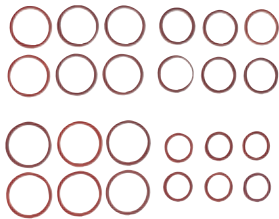

ASSORTMENT of trap washers

Reference	30723218
Ean-13 code	 3 375537 230983
Packaging	Bag
Multiple / Boxed qty	01/125

Fibre PLUMBING WASHERS

	12/17 HOT / COLD WATER
Reference	JVP0101
Ean-13 code	 3 375536 006244
Packaging	Bag
Multiple / Boxed qty	01/425

	15/21 HOT / COLD WATER
Reference	JVP0102
Ean-13 code	 3 375536 006251
Packaging	Bag
Multiple / Boxed qty	01/250

	20/27 HOT / COLD WATER
Reference	JVP0103
Ean-13 code	 3 375536 006268
Packaging	Bag
Multiple / Boxed qty	01/100

Washer SHEET to cut to size

	135 X 225 X 2 MM
Reference	JVX0000
Ean-13 code	 3 375536 003854
Packaging	Bulk
Multiple / Boxed qty	01/90

Fibre WASHERS

1.5MM THICK Ø 20/27 LARG	
Reference	91832001
Ean-13 code	 3 375539 067594
Packaging	Bulk
Multiple / Boxed qty	1000/18000

1.5 THICK Ø 15/21	
Reference	91832101
Ean-13 code	 3 375539 067587
Packaging	Bulk
Multiple / Boxed qty	1000/9000

1.5 THICK Ø12/17	
Reference	91832201
Ean-13 code	 3 375539 067570
Packaging	Bulk

NB : If there is a longer guarantee period on the packaging of the product, the longer period will apply in the event of a claim.

This document comprises the terms and conditions of sale (hereafter "TCS") of company WIRQUIN (hereafter the "Company"), a simplified corporation with a sole shareholder and share capital of € 961,000, listed in the Trade & Companies Register of Nantes under number 309494953, having its registered office at 11 rue du Château de Bel air cedex 44482 Carquefou.

1. Applicability

1.1. These TCS cancel and replace any prior terms of sale. These TCS govern all sales by the Company to its trade customers, (hereafter the "Clients"), comprising in particular:

- retailer clients (distributors running a DIY store and/or an e-commerce site),
- wholesaler clients as defined by article L.441-4, II of the French Commercial Code (distributors running bricks-and-mortar stores and/or e-commerce sites).

2. Orders

2.1. Ordering procedure: All orders should be placed preferably by electronic data interchange or by e-mail sent to orders.fr@wirquin.com. It is up to the Client to ascertain receipt thereof by printing out a receipt notification.

Under a special agreement, orders must be sent to the Company at least:

- for permanent products: ten (10) business days before the agreed delivery date,
- for promotional or cross-marketing products: at least four (4) months before the desired delivery date as regards the final firm order.

2.2. To be valid, the order must in particular specify the products, the product references or EAN codes according to the approved catalogue listing, the quantity and the agreed price, the pollock and date of delivery or collection, as well as any applicable delivery hours, subject to the provisions of clause 2.3 below. All orders must comply with the minimums and order multiples stated in the contract. All orders must be accepted by the Company.

2.3. Special orders: Special orders such as promotional orders and orders for building sites must be placed in a separate and clearly identified document, in any form whatsoever.

2.4. Order refused by the Company: The Company reserves the right to refuse orders or suspend, delay or modify fulfilment thereof, without this giving rise to compensation or penalty in any manner whatsoever, in case of:

- non-observance of the contractual deadlines (including the management of public holidays)
- an abnormal order or order placed in bad faith,
- a clearly excessive order placed prior to the entry into force of a new price list, taking into account the Client's usual ordering volume. An abnormal order is one that exceeds usual requirements by more than 20%, excluding promotional volumes.
- an order for withdrawn products,
- an order that does not meet the Outer (pack quantity),
- if the Client is in breach of any of its obligations,
- if the Company is unable to supply the products, more particularly in exceptional circumstances. Where applicable, the Company undertakes to inform the Client immediately of the difficulties encountered,
- in the event of reputational harm to the brands and products marketed by the Company, including through communication initiated by the Client without the prior written consent of the Company.

2.5. Estimated volumes: in order to anticipate the manufacture and shipment of the products to the Client in sufficient quantities, the contract should state the volumes of deliveries envisaged by the Client (volumes of permanent products and volumes of promotional products), as provided for by article L.441-17 of the French Commercial Code.

The Client is asked to provide a monthly delivery schedule over 6 rolling months, updated every month.

In the absence of such forecasts:

- WIRQUIN will use as estimated quantities the quantities of permanent products delivered during the previous year
- WIRQUIN will have a maximum margin of error regarding deliveries of its products in excess of these quantities.

Accordingly, above such quantities WIRQUIN will not be liable for any penalty on the grounds of missing goods.

In this respect, within two (2) months of the end of the contract, a detailed quantitative account of the contract in question will be drawn up, stating:

- the forecast quantities,
- the ordered quantities,
- the quantities delivered
- and any penalties claimed (and/or received) by the Client in respect of missing goods.

On the basis of this detailed account, the Client will cancel (and/or reimburse any payment made in respect of) any penalties for missing goods that prove not to be due under the terms of this clause.

2.6. Apportioning the products by quota: In the event of shortages, the Company will meet orders as they arrive and according to availability.

2.7. Order cancelled by the Client: Any modification or cancellation of an order must be made no later than twenty-four (24) hours after receipt of the order by the Company and is subject to the Company's prior and express consent. This exemption does not apply to international sales, or to orders for special products or high-volume orders.

2.8. The Company does not manage back orders.

2.9. Orders are accepted by the Company on the basis that the Client presents sufficient financial guarantees ensuring that it can settle any amounts owing on the due date. Accordingly, any changes in the Client's financial guarantees entitle the Company to refuse an order, demand disclosure of the Client's accounting records or require the Client to present sufficient guarantees.

Any deterioration in the Client's credit rating may justify demands for guarantees or cash payment before received orders are fulfilled. A refusal of credit insurance cover may notably be deemed grounds for demanding a guarantee or terms of payment other than those in clause 6 of these TCS.

2.10. Discontinuation of marketing of a product: The Company and the Client undertake to give each other reasonable advance notice of a discontinued product. The practical arrangements of such a discontinuation will be handled jointly by the Company and the Client.

If the discontinuation is imposed by the Client and the articles are delivered under a Distributor brand, the specific obsolete stocks of products and/or components earmarked for the Client will be reinvoiced to the latter.

3. Deliveries – Transport – Transfer of risk

3.1. Delivery

The Company reserves the right to choose the mode of transport and the place of departure of the ordered products.

Deliveries are made on single-trip pallets measuring 80x120 cm. Any exemption must be requested in writing by the Client, and the request may be subject to a price increase if accepted by the Company.

Irrespective of the destination of the goods, on delivery the Client must add its company stamp, signature and name of the signatory on the shipping note.

The Client must unload the goods safely in the shortest possible time using enough manpower.

3.2. Belated deliveries and/or non-delivery of ordered products

The Company cannot be held responsible for any delays caused by third parties, including its subcontractors and road haulage contractors, or in case of force majeure or external circumstances as defined in clause 11 of these TCS. If the Client fails to observe the time of the appointment arranged with the road haulage contractor, the Company shall not be liable for any penalty.

Any late delivery not involving a delay in the delivery date shall not automatically incur penalties, damages, compensation, cancellation of outstanding orders or replacement by the Client.

The same applies for shortages (undelivered quantities) affecting deliveries if the products are still available in warehouses or in stores.

If the appointment arranged by the Client is missed, the Company will invoice the road haulage contractor's cost of waiting.

If the place of delivery requested by the Client changes after the goods are dispatched, the Company will invoice the Client for the cost of rerouting this shipment.

If delivery of the products is delayed at the request of the Client, the actual extra costs of storage and transport thus incurred will be invoiced by the Company.

After an additional period agreed on by the Parties, the Company reserves the right to dispose of the products and deliver other equivalent products within a reasonable extended deadline.

3.3. Order-fill ratio

Any agreement between the parties on a commitment to an order-fill ratio by the Company and any related penalties will be based on the following prior cumulative elements to be provided by the Client: contractually binding target, calculation rule for the order-fill ratio, introduction of a measuring indicator underscoring the order items affected by defaulting delivery, and appointment of a dedicated Supply Chain contact for analysis and possible joint corrective measures. The results must be sent to the Company every month by the dedicated contact.

Failure to meet an agreed order-fill ratio in no way entails an automatic penalty, it simply establishes a possible breach by the Company.

The Company may also request a monthly purchase forecast per catalogue reference.

3.4. Special cases of deliveries to building sites:

For the special case of deliveries to building sites:

- the precise place of delivery must be clearly stated by the Client on the order form,
- the Client must take charge of the management under its responsibility of the manoeuvres needed to access and move around the building site.
- the Client must plan to have a receiving clerk in attendance on the site, whose contact details (name and telephone number) must be stated on the order form in addition to the delivery address, in order to guarantee the date and time of delivery and to take charge of goods receiving operations, including inspection of the condition and number of parcels.
- If no receiving clerk is in attendance on the site, unloading will not take place and the cost of delivery will be chargeable to the Client. The place of delivery must be accessible by a lane or track suitable for vehicles, safe and risk-free for the road haulage contractor commissioned by the Company.
- The Client is responsible for any damage suffered by the delivery vehicles of the Company or its road haulage contractor due to difficult access and/or unsuitable ground. Similarly, the Company accepts no liability if any damage were to be caused to the building site by any of its transport vehicles due to difficult access and/or unsuitable ground. The Client is required to take out all the necessary insurance policies for equipment not fully paid for and/or stored on the site pending installation, with effect from the date of transfer of the risk, i.e. when the product is received and the delivery note is signed.

These policies should in particular cover the following risks: theft, fire, explosion, natural disasters, transport, equipment damage. The Client transfers to the Company the services to which these insurance policies entitle it. If the Client is unable to prove it has the necessary insurance policies, the Company may take them out itself at the Client's expense. The Client must immediately notify the Company of any claimable loss.

3.5. Transfer of risk

Irrespective of the shipment method for the products, and notwithstanding the reservation of title clause stipulated in clause 8.1 below, the risks and perils revert to the Client when the products are delivered to the Client's warehouses, before unloading operations barring an Incoterm agreed on by the Parties. If the shipment were to be delayed due to Client behaviour or for a reason beyond the control of the Company, the risk is transferred when the Client is notified that the products are available.

Accordingly, and barring a provision to the contrary expressly agreed on by the Parties, the Client must take out an insurance contract at its own expense covering the risks relating to the transport of the ordered products between their point of departure (or according to the negotiated Incoterm) and their point of arrival.

3.6. Resale at a loss

The Company will be obliged to suspend its deliveries to the Client in the event of non-observance of applicable economic regulations, and in the event of blatant reselling at a loss or branded/loss leader on products that directly affect the brand image of the latter.

3.7. Damage in transit – Missing goods

In the event of damage in transit, loss or belated delivery due to the fault or negligence of the transport contractors, it is up to the consignee Client to record any reservations in the presence of the driver on the duly dated and signed waybill (CMR), with confirmation sent to the transport contractor, in accordance with article L.133-3 of the French Commercial Code,

- within three (3) days of delivery for sales in metropolitan France,

- within seven (7) days of delivery for international sales,

and to send a copy thereof along with the waybill (CMR, photos of the damaged products with identification of the pallets/boxes) concerned, by registered letter with acknowledgement of receipt to the Company's registered office within five (5) days of receipt of the products, on pain of forfeiture of the claim vis-à-vis the Company.

These conditions being met, and after verification of the pertinence of the invoked damage in transit or missing goods, the credit notes will only be issued to the Company's Client that purchased the products in question.

3.8. Product returns

All product returns are subject to a formal agreement between the Company and the Client; failing which, the product will be kept at the disposal of the Client and no credit note will be issued. The costs and risks of return are always borne by the buyer. Returned goods are shipped together with a return form affixed to the parcel and must be in the condition in which the supplier delivered them.

3.9. Nonconformity not detectable on receipt

The Client must send the Company a registered letter with acknowledgement of receipt stating any complaint concerning obvious defects of the Products or their nonconformity with the order or concerning the invoicing, within eight (8) days of receipt of the Products concerned. The Client must provide evidence of the reality of the observed defects or irregularities in order to facilitate identification of the batch of products concerned and enable the Company to remedy them.

Any complaint must in particular include the delivery note and the purchase invoice, and the packaging of the Products in question must be kept.

Failing which, the Company will be released from any obligation vis-à-vis the Client, who will be deemed to have accepted the products.

In the event of defects or nonconformity of the delivered products duly noted by the Company, and barring a special agreement between the Company and the Client, the Company will issue a credit note for the value of the product recognized as non-conforming, to the exclusion of any other compensation or damages. These conditions being met, and after verification of the pertinence of the invoked nonconformity, the credit notes will only be issued to the Company's Client that purchased the products in question.

4. Penalties

4.1. No penalty systematic, fixed-rate and/or non proportional to the loss suffered by the Client can be chargeable to the Company.

4.2. Pursuant to article L.441-17 of the French Commercial Code, the guidelines published by the DGCCRF (Directorate-General for Competition, Consumer Affairs and Fraud Prevention) on 11 July 2022 and the new code of good conduct Inoha-FMB of 15 June 2022, any claim for penalty made by the Client must be lodged in writing and be accompanied by a threefold demonstration, on a case-by-case basis:

- the Company's failure,
- the consequential loss actually suffered by the Client,
- an appraisal of the said loss.

This claim will give rise to an adversarial exchange.

Logistics penalties are limited to a maximum amount of 2% of the value of the ordered products in the category of products in which failure to fulfil contractual commitments was observed.

The ceiling must be calculated per order with respect to the categories of products in the price list.

4.3. All claims for penalties must be sent to the Company within no more than two (2) months from their operative event (after which time, the Company will nonetheless process the penalty by reserves the right to invoice the Client for additional administrative expenses in respect of the belated processing).

4.4. You are reminded that any invoice and/or debit note issued by the Client must be accompanied by supporting documents the Company needs to assess its well-foundedness, in particular at least:

- o the order number, per point of delivery concerned,
- o the delivery date,
- o the products concerned (GTIN codes, descriptions),
- o the quantities concerned, the precise and detailed nature of the delivery incident,
- o the precise and detailed nature of the delivery incident (delay, nonconformity, missing products, etc.), and for a delay, the planned time windows of delivery and the actual time of delivery or collection (the duplicate of the signed and stamped delivery note or the timestamped dispatch note), so as to facilitate as much as possible the identification and verification of the penalty's operative event and its amount by the Company;
- o any relevant documents evidencing the delivery incident (e.g.: photographs),
- o the nature of the loss actually suffered,
- o and justification of the amount of the loss in order to determine an acceptable penalty value.

4.5. Penalties do not constitute unquestionable claims in themselves. Accordingly, penalties can only be the subject of compensation under articles 1347-1 et seq of the French Civil Code after the Client's grievance has been ascertained and the prior written consent of the Company following an adversarial discussion.

4.6. The Client and the Company must make sure to meet at least once (1) a quarter to discuss any ongoing disputes, paying particularly careful attention to the situations in question (due observance of the ordering and/or pre-ordering processes, external factors, seasonality, etc.).

4.7. Any invoice for logistics penalties must be issued at the latest one year after the facts on which the penalties are based. Failing which, no sum of any kind will be due in respect of the facts in question, even if they are proven and a loss has been demonstrated.

5. Guarantee on WIRQUIN products – Rights and claim deadline

5.1. The Company hereby certifies that the products it sells are compliant with mandatory French and community standards and regulations in force on the day of these TCS and are manufactured in accordance with human and children's rights, and with current social legislation in the countries of production.

5.2. In addition to existing legal guarantees, the products are guaranteed against any manufacturing fault or malfunctions hidden at the time of the initial sale, excluding wear parts and showroom models (not guaranteed), for a period of ten (10) years, subject to the conditions and limitations listed below. The guarantee starts on the date of purchase by a non-trade customer, as attested to by the sales receipt (the guarantee only applies on presentation of the said dated sales receipt).

For trade customers who supply, install and fit the product, it is expressly agreed that the guarantee starts on the date of installation of the product (as attested to by their invoice for the supply and fitting of the product).

If the product is resold or transferred to a third party, the guarantee on the products sold is transferable to successive buyers, subject to due observance of the conditions and statements in this clause. The beneficiary of the guarantee must provide the original proof of purchase and any document proving transfer of ownership to exercise their rights. The guarantee will continue to apply under the same initial conditions, without any extension of the original guarantee period.

NB: If there is a longer guarantee period on the packaging of the product, the longer period will apply in the event of a claim.

5.3. As chosen by the Company, the guarantee is limited to a refund (credit note sent to the store), or reconditioning or replacing the part(s) recognized as faulty or the cause of malfunctioning with an identical part or parts. On no account can the following claims be made: labour costs, travel expenses, damages including for loss of use or other damages.

5.4. Returning the original packaging. Acceptance of a guarantee claim on products sold by the Company is not conditional on returning the original packaging. In the event of a faulty or nonconforming product, a non-trade customer can make a guarantee claim, even if the original packaging has been damaged or discarded. We nonetheless recommend that non-trade customers should keep the accessories and fittings supplied with the product in order to facilitate the processing of the claim.

5.5. The Company cannot be held liable, and the guarantee will not apply, in the event of abnormal use of the product, such as: non-compliant or unsuitable installation; lack of upkeep by the user; use of industrial or other cleaning products not intended for use on sanitary fittings, or chemical products; wear and tear by substances or foreign bodies conveyed by or contained in the water (more particularly severe formation of limescale) or external factors such as rodents; draining boiling oil or fluids at extreme temperatures, negligence in handling; accidents and shocks, deterioration by foreign bodies; modification of the original product; incorrect fitting or use of the fitting (including non-observance of the instructions for use supplied with the product);

5.6. Any spare parts supplied outside the guarantee period will be invoiced along with postage and packing costs.

5.7. Barring an express agreement, the Company will not assume the consequences of a product recall or withdrawal operation organized solely on the initiative of the Client. Only product recalls organized at the request of the Company itself or an administrative authority will be supported by the Company in agreement with the Client, without any additional compensation.

5.8. Spare parts essential for the use of products sold are available for ten (10) years from the date of discontinuation of marketing of the product.

5.9. The sales figure for the spare parts category is net of any discount and cannot be counted as bonifiable sales

6. Price list

6.1. The applicable price list is the general price list applying on the date of delivery, this being understood as the day on which the Products leave WIRQUIN warehouses. This price list is at the disposal of the Client on request.

6.2. The prices in the price list are non-negotiable and include material and immaterial components such as the costs of processing, transport, labour, raw materials, intellectual property items and investment in research and development.

Furthermore, CSR issues (recycled raw materials, packaging, logistics, etc.) lead to significant investments in order to meet the expectations of society. Regarding the negotiation, any request made by the Client will be examined both on the basis of its cost and return on investment and on the basis of its CSR impact.

6.3. The price is stated in euros excluding tax, free of packing and carriage paid from five hundred and fifteen (515) euros. If the minimum amount set to be eligible for carriage paid is not achieved, postage and packing will be at least forty-five (45) euros.

For deliveries greater than or equal to 515 euros excluding tax, delivery free of charge does not apply in the following cases:

- Delivery outside metropolitan France;
- Express delivery;
- For logistics centres benefiting from special terms of purchase;
- When special terms have been agreed between the Supplier and the Buyer.

6.4. International deliveries or deliveries to warehouses or the industry division clientele may be given special conditions.

6.5. On an exceptional basis, certain dispatches may be made by courier. However, the additional cost of an express delivery is borne exclusively by the Client and will be invoiced separately by WIRQUIN.

No discount is granted for collection.

6.6. Clients will be informed of any price changes at least thirty (30) days before they apply, barring exceptional situations justifying early implementation (e.g.: a significant and/or exceptional increase in the cost of raw materials, increase in the cost of transport, etc.).

6.7. Prices do not include the Eco-Emballage (eco-packaging) contribution. In accordance with the provisions of article R.543-290-3 of the Code of Environmental Law, the unitary eco-contribution our Company must pay as vendor in respect of its extended producer responsibility concerning building products and materials is reinvoiced to the buyer, without the possibility of rebate, and appears on the invoices. For eco-contributions, this means that any discount, reduction, trade discount or rebate on a product subject to extended producer responsibility for building products and materials cannot reduce the amount of the reinvoiced unitary eco-contribution, which will ultimately be remitted to the producer responsibility organization approved by our Company.

7. Terms and conditions of payment

7.1. Invoicing

An invoice is drawn up for each delivery and issued on the date of departure of the goods from our factory. The invoice includes all the mandatory legal information, including markdowns granted on the date of the sale and directly related to this sale.

Invoices are issued in PDF format, signed by an electronic certificate in accordance with article 289 VII 2° of the French general tax code via our service provider C'PRO, or in EDI form in accordance with article 289-VII 3° of the French general tax code.

Invoices can be issued in paper format and sent by post (1 copy) in accordance with paragraph 1 of article 289 VII or 289-VII 1° of the French general tax code, with a written request from the Client, and any requested additional duplicates are invoiced six euros (€6).

Failure to draw up the invoice has no effect on the payability of the price.

Barring dispensatory agreement or in case of a risk of insolvency as stated in clause 2 herein, all invoices are payable at the registered office of the Company.

The payment deadline is the thirtieth (30) day after the date of receipt of the goods, in accordance with article L.441-10 of the French Commercial Code.

Payment is taken to mean actual collection by the Company of amounts payable by the Client under the following conditions:

- bank transfer: the day on which the transfer is issued,
 - bill of exchange and promissory note: bills of exchange must be returned accepted by the Company within no more than ten (10) days before the due date.
- A cash discount of 0.10% is granted for early payment by whole month.

7.2. Offsetting

No offsetting is accepted by the Company except under the conditions of articles 1347 et seq of the French Civil Code, i.e. with the proviso that the receivables are uncontested, liquid and enforceable, bearing in mind that no penalty can be construed as uncontested. Where applicable, each party offsetting invoices will notify the other party of the references of the offset invoices in order to facilitate their book-keeping.

Any offsetting or deduction done wrongly will be deemed an overdue payment by the Client and bear the consequences thereof (interest, debt collection charges, etc.).

7.3. Overdue payments

Any belated payment compared with the payment date stated on the invoice will as of right, as the Company chooses, incur:

- late payment charges by applying an annual rate of 10%,
 - a set fee for recovery costs of forty (40) euros,
 - repayment of all costs incurred for contentious debt collection of outstanding amounts, including the fees of officers of the court.
- event of default for outstanding receivables,
- suspension and/or cancellation of all outstanding orders,

- suspension and/or cancellation of agreed price markdowns,
- payment prior to delivery for any outstanding orders.

On no account, even in the event of a dispute, can payments be suspended or offset without the prior written consent of the Company. Any part payment will first be charged to the non-privileged part of the receivable, then charged to sums having the oldest due date, in accordance with article 1342-10 paragraph 2 of the French Civil Code.

If payment is made by a bill of exchange, the non-return of the bill will be deemed non-acceptance thereof and consequently treated as a non-payment. Similarly, when payment is staggered, non-payment of one instalment will entail the immediate payability of the total debt, without formal notice.

In all the above cases, the sums due for other deliveries or for any other reason will fall due immediately if the Company does not opt for cancellation of the corresponding orders.

8. Reservation of title clause

Ownership of the products only reverts to the Client after full payment of the purchase price (principal, costs and interest) by the latter, irrespective of the date of delivery.

Accordingly, the Company retains full title to the products sold, so that it may repossess the said products, until full payment of the price by the Client. In the event of action to establish title, the Company will retain any advance payment made by the Client as a recovery fee, without prejudice to any other action it may be entitled to take against the Client.

Any provision to the contrary, possibly inserted into the Client's standard terms of purchase, is deemed unwritten, in accordance with article L.624-16 of the French Commercial Code.

By express agreement, the Company may invoke its rights under this reservation of title clause, for any of its receivables, for all its products in the possession of the Client, the latter being contractually deemed unpaid, and the Company may take them back or claim them as compensation for all outstanding invoices, without prejudice to its right to cancel outstanding sales.

The Client is permitted to resell the products as part of the normal operation of its business. This permission to resell is withdrawn automatically in the event of judicial administration proceedings or judicial liquidation.

In the event of such proceedings, the Client undertakes to inform the Company by registered letter within fifteen (15) days of notification of insolvency.

This clause does not preclude the risks of the goods being transferred to the buyer when they leave the Company's factory, the said buyer then assuming the responsibility of consignee and custodian of the said goods until full payment of the price. Accordingly, the risk of loss and deterioration of the products is transferred when they are dispatched by the Company, the Products travelling at the risk of the Client; in the event of damage in transit or missing goods, it is therefore up to the Client to make all necessary observations and confirm its reservations by extrajudicial process or by registered letter with acknowledgement of receipt with the road haulage contractor within three days or receipt of the goods.

9. Shorter commercial period of limitation

Any claim more particularly concerning any sums owed by the Company in respect of a calendar year, for any reason and of any nature, must be notified to it by registered letter with acknowledgement of receipt within no more than twelve (12) months after the end of the calendar year in question.

The Company will do its utmost to send each of its Clients, on the thirtieth (30) of June of every year, a statement of fulfilment of their respective commitments in respect of the past calendar year. The purpose of this statement is to settle reciprocal commercial receivables and debts in respect of the said year. On this statement, the Company will summarize all the sums it believes it owes and are owed to it. If the Client does not respond within two (2) months, the detailed account will be deemed accepted and the party in debit will settle the amounts owing without delay, where applicable by offsetting them.

Beyond that and notwithstanding the provisions of article L.110-4 of the French Commercial Code, no sums in respect of the past calendar year can be claimed, be it among other things in respect of selling prices, discounts, volume discounts, trade cooperation, possible penalties and promotions.

10. Special provisions concerning reference listings of the Company by distributor Clients

10.1. The Company and the Client agree to refer to the provisions of the New Code of Good Conduct signed by INOHA and FMB and any existing or future updates, more particularly for the procedure and deadlines applying to the discontinuation of business relations (delisting and non-renewal of a reference listing).

10.2. In the event of discontinuation of business relations, the Company will not take back unsold products or stocks of products from the Client. The Client must return the concepts and sales support tools at its own expense.

Barring a special agreement, any new reference listing or modification of an existing reference listing cannot result in the Company taking back stocks of third-party products or own products no longer marketed by the retail chain.

10.3. Any discount or commercial cooperation agreement calculated on the Company's sales with the Client will be based on the sales invoiced and paid to the Company after deduction of unsettled debts, credit notes and free goods granted, travel expenses, filings for bankruptcy, the amount of any new contribution, possible unsettled debts and late payment penalties. Any commercial cooperation agreement or agreement on services provided to the Company by the Client will be invoiced on the basis of reciprocal due dates. The said invoices will be payables within the same deadlines and under the same conditions as those applying to payments for goods.

10.4. The Client, a service provider under a commercial cooperation agreement or agreement on services, furthermore certifies that the services will be compliant with the French Commercial Code, and undertakes to provide evidence thereof on request.

11. Force majeure, external circumstances and hardship clause

11.1. The Company cannot be held liable for non-performance or improper performance of the contract due to the Client, or to an insurmountable and unforeseeable fact due to a third party to the contract, or to a case of force majeure as defined by article 1218 of the French Civil Code.

The Company will notify the Client of the occurrence of such a case of force majeure as soon as possible; the Company will be released from its obligations and no compensation, damages, penalties or costs in connection with the case of force majeure can be claimed from it on that account.

11.2. However, in accordance with Recommendations 19-1 and 20-1 of the CEPC (French trade practices review board), the conditions for invoking article 1218 of the French Civil Code do not preclude possible discussions between the Client and the Company and adaptation of the agreement and its applicability (including penalty conditions) in view of the situation in question that would not necessarily match the definition of force majeure, more particularly in case of an event liable to stop, reduce and/or delay manufacture of the Products, their storage or transport for instance:

- the shutdown or lack of production and/or transport facilities, in particular due to strikes,
- shortages of raw materials due to bad weather and sanitary lockout,
- blockages of industrial sites or storage warehouses or transport routes,
- a health crisis, weather hazards on an exceptional scale,
- proven shortage of raw material with advance notice,
- the consequences of a change in the organization of the Client's supply chain or operations.

Where appropriate, the Company and the Client undertake to discuss in good faith, without undue delay and with due regard for their reciprocal interests, and no adaptation of the commercial agreement could be made without prior consultation.

11.3. In the event of a change in circumstances unforeseeable when the written agreement was signed that makes performance of the said agreement excessively costly for the Company, the latter may request a renegotiation of the written agreement.

The parties shall then renegotiate the agreed price, within no more than one (1) month from the Company's request to renegotiate. The renegotiation should be done in good faith and with due regard for industrial, commercial and trade secrets, in order to preserve the economic balance of the business relationship.

If no agreement on a new agreed price is reached within the aforesaid one (1) month deadline, relations between the Parties will continue under the terms and conditions laid down by the written agreement, unless the Company wishes to terminate it, in full or in part, subject to observing a period of notice agreed on by the parties.
